# Professional Plant Protection

International Journal of Professional Plant Protection

## Aims and Scope

Professional Plant Protection is an international journal on aspects of Professional Plant Protection. It publishes critical reviews, papers and short communications on the results of original research, experimentation or professional experiences related to plant protection. It is a journal carried out by plant protection professionals for the plant protection and plant production companies: all of the works to be published in the journal must be based in experiences carried out in commercial enterprises, being these horticultural, ornamental or viticultural companies. The journal will only include applied investigation. The journal will willingly accept experiences related to Plant protection described either by technicians or plant protection managers. The journal will also accept investigation carried out by formal investigation groups, either private or public, belonging to formal investigation centers or to private or public universities, but always based on experiences carried out in commercial production companies.

This journal has no impact factor.

Visual guide of plant quarantine agents worldwide II: data sheets of agents published by the project international plant quarantine on 2021.

Agents data sheets carried out with photographs supplied by Consultorías Noroeste S.C.

All of the data sheets carried out with photographs supplied by Consultorías Noroeste S.C. were written by J.L. Andrés Ares.

Cover photograph supplied by Dra. Aline Ferreira – Brazil.

Quarantine Agent – Host

1. *Phytophthora capsici* – *Capsicum annuum*
2. *Bremia lactuca* – *Lactuca sativa*
3. *Clavibacter michiganense* ssp. *Michiganense* – *Solanum tuberosum*
4. *Colletotrichum lindemutianum* – *Phaseolus vulgaris*
5. *Phyllotreta nemorum* – *Brassica* sp.
6. *Phytophthora infestans* – *Solanum tuberosum*
7. *Phytophthora infestans* – *Solanum lycopersicum*
8. *Plasmodiophora brassicae* – *Brassica oleracea*
9. *Podosphaera fusca* – *Cucurbita pepo*
10. *Rhizoctonia solani* – *Brassica oleracea*
11. TSWV – *Capsicum annuum*
12. *Verticillium dahlia* – *Capsicum annuum*

13. *Autographa gamma* – *Pelargonium* × *hortorum*
14. *Autographa gamma* – *Cyclamen persicum*
15. *Plasmopara obducens* – *Impatiens walleriana*
16. *Puccinia chrysanthemi* – *Chrysanthemum*
17. *Puccinia horiana* – *Chrysanthemum*
18. *Puccinia perlargonii* – *zonalis* – *Pelargonium* × *hortorum*
19. *Mycosphaerella dianthi* – *Dianthus caryophyllus*
20. *Otiorhynchus sulcatus* – *azalea*
21. *Tetranychus urticae* – *Buxus sempervivens*
22. *Rhizoecus falcifer* – *Buxus sempervivens*
23. *Tetranychus urticae* – *Camellia japonica*
24. *Otiorhynchus sulcatus* – *Camellia japonica*
25. *Trioza alacris* – *Clematis* sp.
26. *Tetranychus urticae* – *Cotoneaster lacteus*
27. *Tetranychus urticae* – *Dianthus caryophyllus*
28. *Tetranychus urticae* – *Gleditsia triacanthos*
29. *Polyphagotarsonemus latus* – *Laurus nobilis*
30. *Otiorhynchus sulcatus* – *Metrosideros robusta*
31. *Otiorhynchus sulcatus* – *Osmanthus*
32. *Limantria dispar* – *Quercus robur*
33. *Otiorhynchus sulcatus* – *Rhododendron* sp.
34. *Otiorhynchus sulcatus* – *Thuja plicata*
35. *Phyllosticta ampelicina* – *Aesculus hippocastaneum*
36. *Phytophthora nicotianae* – *Araucaria araucana*
37. *Phytophthora nicotianae* – *Boronia gunni*
38. *Phytophthora ramorum* – *Buddleia*
39. *Armillaria mellea* – *Cedrus atlantica*
40. *Phytophthora citrophthora* – *Citrus lemon*
41. *Phytophthora cinnamomi* – *Correa speciosa*
42. *Gymnosporangium sabiniae* – *Crataegus monogina*
43. *Rhizoctonia solani* – *Dianthus caryophyllus*
44. *Phytophthora cinnamomi* – *Gardenia japonica*

45. *Phytophthora cinnamomi* – *Juniperus*
46. *Phytophthora cinnamomi* – *Arbutus unedo*
47. *Phytophthora cinnamomi* – *Metrosideros × robusta*
48. *Phytophthora ramorum* – *Photinia × fraserii*
49. *Phytophthora ramorum* – *Pieris japonica*
50. *Plasmopara viticola* – *Vitis vinifera*
51. *Uncinula nectarator* – *Vitis vinifera*

All of the data sheets carried out with photographs supplied by other members of the workgroup were written by J.L. Andrés Ares

Quarantine Agent – Host – Author of the data sheet

Note: Either the data sheets of quarantine weeds as some of the data sheets that only include photographs of pathogens are not related with a specific host.

52. *Scyphophorus acupunctatus* – *Agave Americana* – Miguel Sicilia
53. *Theba pisana* – *Persea americana* – Miguel Sicilia
54. *Olygonichus perseae* – *Persea americana* – Miguel Sicilia
55. *Parasaissetia nigra* – *Annona cherimola* – Miguel Sicilia
56. *Dactylopius coccus* – *Opuntia ficus – indica* – Miguel Sicilia
57. *Stigmina carpophila* – *Prunus armeniaca* – Miguel Sicilia
58. *Lasiodiplodia theobromae* – *Vitis vinifera* – Cinthia Martínez
59. *Phymatotrichopsis omnívora* – *Juglans regia* – Cinthia Martínez
60. *Clavibacter michiganensis* subsp. *michiganensis* – *Solanum lycopersicum* – Cinthia Martínez
61. *Meloidogyne incognita* – *Solanum lycopersicum* – Cinthia Martínez
62. *Spodoptera frugiperda* – *Zea mays* – Cinthia Martínez
63. *Heliothis zea* – *Zea mays* – Cinthia Martínez
64. *Copitarsa decolora* – *Lactuca sativa* – Cinthia Martínez
65. *Paysandisia archon* – *Livistona chinensis* – Miguel Sicilia
66. HVBA – *Oryza sativa* – Johanna Echeverri
67. HVBA – *Echinochloa sp.* – Johanna Echeverri
68. *Tagosodes oryzicolus* – *Oryza sativa* – Johanna Echeverri
69. *Gaeumannomyces graminis* var. *graminis* – *Oryza sativa* – Johanna Echeverri
70. Virus de la necrosis rayada del arroz – *Oryza sativa* – Johanna Echeverri

71. *Helicotylenchus dihistera* – Aline Ferreira
72. *Heterodera glycines* – *Glycine max* – Aline Ferreira
73. *Meloidogyne exigua* – Aline Ferreira
74. *Meloidogyne paranaensis* – *Coffea arabica* – Aline Ferreira
75. *Meloidogyne spp.* – Liliana Estupiñán
76. *Meloidogyne exigua* – Liliana Estupiñán
77. *Pratylenchus zae* – Liliana Estupiñán
78. *Pratylenchus spp.* – Liliana Estupiñán
79. *Meloidogyne incognita* – *Lactuca sativa* – Liliana Estupiñán
80. *Heterodera glycines* – Liliana Estupiñán
81. *Meloidogyne incognita* – Liliana Estupiñán
82. *Meloidogyne incognita* – *Abelmoschus esculentus* – Liliana Estupiñán
83. *Helicotylenchus dihistera* – Liliana Estupiñán
84. *Pratylenchus brachyurus* – *Solanum lycopersicum* – Liliana Estupiñán
85. *Rotylenchus reniformis* – *Lactuca sativa* – Liliana Estupiñán
86. *Meloidogyne spp.* – *Coffea arabica* – Liliana Estupiñán
87. *Meloidogyne spp.* – *Abelmoschus esculentus* – Liliana Estupiñán
88. *Meloidogyne incognita* – *Lactuca sativa* – Liliana Estupiñán
89. *Rotylenchus reniformis* – Liliana Estupiñán
90. *Meloidogyne javanica* – Liliana Estupiñán
91. *Meloidogyne paranaensis* – *Coffea arabica* – Liliana Estupiñán
92. *Rotylenchus reniformis* – *Gossypium hirsutum* – Liliana Estupiñán
93. *Giberella zae* – *Zea mays* – Camila Lage – Laboratorio Agronomica
94. *Meloidogyne spp.* – Elaheh Gerami
95. *Pratylenchus brachyurus* & *P. zae* – Camila Lage – Laboratorio Agronomica
96. *Phytophthora palmivora* – Camila Lage – Laboratorio Agronomica
97. *Phytophthora palmivora* – *Theobroma cacao* – Camila Lage – Laboratorio Agronomica
98. *Erwinia spp.* – *Solanum tuberosum* – Camila Lage – Laboratorio Agronomica
99. *Chrysomphalus aonidium* – *Mangifera indica* – Laboratorio Agronomica
100. *Papaya Meleira Virus* – *Carica papaya* – Laboratorio Agronomica

101. *Cenopalpus pulcher* – *Malus domestica* – Laboratorio Agronomica
102. *Aleurothrixus floccosus* – *Citrus × sinensis* – Laboratorio Agronomica
103. *Hemiberlesia palmae* – *Cocos nucifera* – Laboratorio Agronomica
104. *Lasiodiplodia theobromae* – *Vitis vinifera* – Laboratorio Agronomica
105. *Rotylenchus reniformes* – Laboratorio Agronomica
106. *Diaporthe citri* – *Citrus × sinensis* – Laboratorio Agronomica
107. *Xanthomonas citri* sbsp. *citri* – *Citrus × sinensis* – Laboratorio Agronomica
108. *Criptomolestes ferrugineus* – *Oryza sativa* – Laboratorio Agronomica
109. *Thrips palmi* – *Cucurbita pepo* – Laboratorio Agronomica
110. *Fusarium graminearum* – *Zea mays* – Laboratorio Agronomica
111. *Rhizoglyphus robini* – Laboratorio Agronomica
112. *Scutellonema brachyurus* – *Zea mays* – Laboratorio Agronomica
113. *Stenocarpella macrospora* – *Triticum aestivum* – Laboratorio Agronomica
114. *Fusarium fujikuroi* – *Zea mays* – Laboratorio Agronomica
115. *Pratylenchus zaeae* – *Zea mays* – Laboratorio Agronomica
116. *Spodoptera frugiperda* – *Capsicum annuum* – Laboratorio Agronomica
117. *Helix aspersa* – Laboratorio Agronomica
118. *Cenopalpus pulcher* – *Pyrus communis* – Laboratorio Agronomica
119. *Raoiella indica* – *Musa paradisiaca* – Laboratorio Agronomica
120. *Acarus siro* – Laboratorio Agronomica
121. *Rhizoctonia solani* – *Medicago sativa* – Laboratorio Agronomica
122. *Lepidosaphes gloveri* – *Citrus × sinensis* – Laboratorio Agronomica
123. *Aphelenchoides besseyi* – *Brachiaria ruziziensis* – Laboratorio Agronomica
124. *Pratylenchus penetrans* – *Prunus persica* – Laboratorio Agronomica
125. *Cladosporium carpophyllum* – *Prunus persica* – Laboratorio Agronomica
126. *Sclerotinia sclerotiorum* – Laboratorio Agronomica
127. *Colletotrichum acutatum* – *Catharanthus roseus* – Laboratorio Agronomica
128. *Helicotylenchus dihystra* – *Glycine max* – Laboratorio Agronomica
129. *Stenocarpella maydis* – *Zea mays* – Laboratorio Agronomica
130. CMV – *Nicotiana tabacum* – Laboratorio Agronomica

131. PVY – *Nicotiana tabacum* – Laboratorio Agronomica
132. *Leptoglossus occidentalis* – Laboratorio Agronomica
133. PPV – *Prunus persica* var. *nucipersica* – Laboratorio Agronomica
134. ToCV – *Solanum tuberosum* – Laboratorio Agronomica
135. *Helicotylenchus dihystra* – *Nicotiana tabacum* – Laboratorio Agronomica
136. *Pectobacterium carotovorum* – *Cucurbita maxima* – Laboratorio Agronomica
137. CMV – *Adenium obesum* – Laboratorio Agronomica
138. *Clavibacter michiganensis* – *Solanum lycopersicum* – Laboratorio Agronomica
139. *Brevipalpus lewisi* – *Vitis vinifera* – Laboratorio Agronomica
140. *Phthorimaea operculella* – *Solanum tuberosum* – Laboratorio Agronomica
141. *Ralstonia solanacearum* – *Solanum lycopersicum* – Laboratorio Agronomica
142. *Colletotrichum truncatum* – *Glycine max* – Laboratorio Agronomica
143. *Meloidogyne javanica* – *Solanum lycopersicum* – Laboratorio Agronomica
144. *Protopulvinaria pyriformis* – Laboratorio Agronomica
145. *Meloidogyne ethiopica* – *Solanum lycopersicum* – Laboratorio Agronomica
146. *Meloidogyne incognita* – Laboratorio Agronomica
147. *Colletotrichum gloeosporioides* – *Persea americana* – Laboratorio Agronomica
148. *Colletotrichum truncatum* – *Carica papaya* – Laboratorio Agronomica
149. *Guignardia bidwellii* – *Vitis rotundifolia* – Laboratorio Agronomica
150. *Fusarium graminearum* – *Zea mays* – J.L. Andrés Ares & A. Rivera Martínez
151. *Tridax procumbens* – Laboratorio Agronomica
152. *Setaria pumila* – Laboratorio Agronomica
153. *Phalaris paradoxa* – Laboratorio Agronomica
154. *Chenopodium album* – Laboratorio Agronomica
155. *Papaver* sp. – Laboratorio Agronomica
156. *Galium aparine* – Laboratorio Agronomica
157. *Phthorimaea operculella* – Laboratorio Agronomica
158. *Descurainia sophia* – Laboratorio Agronomica
159. *Heterodera glycines* – *Glycine max* – Liliana Estupiñán
160. *Physoderma maydis* – *Zea mays* – Eder Moreira

161. *Kabatiella zae* – *Zea mays* – Eder Moreira
162. *Neonectria ditissima* – *Malus domestica* – Laboratorio Agronomica
163. *Heterodera glycines* – *Glycine max* – Liliana Estupiñán
164. *Globisporangium irregulare* – J.L. Andrés Ares & A. Rivera Martínez
165. *Pythium myriotilum* – J.L. Andrés Ares & A. Rivera Martínez
166. *Pythium tracheiphilum* – J.L. Andrés Ares & A. Rivera Martínez
167. *Pythium tracheiphilum* – *Lactuca sativa* – J.L. Andrés Ares & A. Rivera Martínez
168. *Pythium aphanidermatum* – J.L. Andrés Ares & A. Rivera Martínez
169. *Pythium oligandrum* – J.L. Andrés Ares & A. Rivera Martínez
170. *Pythium peritium* – *Phyllostachys aurea* – J.L. Andrés Ares & A. Rivera Martínez
171. *Globisporangium ultimum* – J.L. Andrés Ares & A. Rivera Martínez
172. *Globisporangium ultimum* – *Phaseolus vulgaris* – J.L. Andrés Ares & A. Rivera Martínez
173. *Phytophthora vexans* – J.L. Andrés Ares & A. Rivera Martínez
174. *Phytophthora vexans* – *Impatiens hawkerii* – J.L. Andrés Ares & A. Rivera Martínez
175. *Pythium debaryanum* – J.L. Andrés Ares & A. Rivera Martínez
176. *Phytophthora cinnamomi* – J.L. Andrés Ares & A. Rivera Martínez
177. *Globisporangium hypogynum* – J.L. Andrés Ares & A. Rivera Martínez
178. *Cydia pomonella* – *Malus domestica* – Laboratorio Agronomica
179. *Aleurothrixus floccosus* & *Aleurocanthus woglumi* – *Citrus reticulata* – Laboratorio Agronomica
180. *Neoleucinodes elegantalis* – *Capsicum annuum* – Laboratorio Agronomica
181. *Lepidosaphes neckii* – *Citrus sinensis* – Laboratorio Agronomica
182. *Spodoptera frugiperda* – *Zea mays* – Laboratorio Agronomica
183. *Ustilago maydis* – *Zea mays* – Laboratorio Agronomica
184. *Streptomyces scabiei* – *Solanum lycopersicum* – Laboratorio Agronomica
185. *Dickeya zae* – *Zea mays* – Laboratorio Agronomica
186. *Venturia oleaginea* – *Olea europaea* – Laboratorio Agronomica
187. *Dytilenchus dipsaci* – *Allium sativum* – Laboratorio Agronomica
188. *Puccinia pelargonii* – *zonalis* – *Pelargonium × hortorum* – Laboratorio Agronomica
189. *Glomerella cingulata* – *Vitis vinifera* y *V. labrusca* – Laboratorio Agronomica
190. *Rotylenchus reniformis* – *Zea mays* – Laboratorio Agronomica

191. *Aphelenchoides besseyi* – *Brachiaria ruziziensis* – Laboratorio Agronomica
192. *Xylella fastidiosa* – *Malus domestica* – Laboratorio Agronomica
193. CTV – *Citrus × bergamia* – Laboratorio Agronomica
194. *Brevipalpus chilensis* – *Actinidia deliciosa* – Laboratorio Agronomica
195. *Colletotrichum truncatum* – *Glycine max* – Laboratorio Agronomica
196. *Trichodorus* sp. *Vitis labrusca* – Laboratorio Agronomica
197. *Meloidogyne incognita* – *Nicotiana tabacum* – Laboratorio Agronomica
198. *Colletotrichum gloeosporioides* – *Persea americana* – Laboratorio Agronomica
199. *Daktulospharia vitifoliae* – *Vitis vinifera* – Laboratorio Agronomica
200. *Meloidogyne javanica* – *Daucus carota* – Laboratorio Agronomica
201. *Pieris brassicae* – M. Sicilia
202. *Coccus hesperidum* – *Passiflora quadrangularis* – Fredy Alexander Rodríguez Cruz
203. *Ceratitidis capitata* – *Ficus carica* – M. Sicilia
204. *Colletotrichum acutatum* – Cinthia Martínez
205. *Verticillium albo-atrum* – Cinthia Martínez
206. *Verticillium dahliae* – *Spinacia oleraceae* – Cinthia Martínez
207. *Phytophthora infestans* – *Solanum lycopersicum* – Cinthia Martínez
208. PRSV – *Carica papaya* – Laboratorio Agronomica
209. *Pratylenchus zae* – *Zea mays* – Aline Ferreira
210. *Olygonichus punicae* – *Persea americana* – Miguel Sicilia
211. *Lasioidiplodia theobromae* – *Persea americana* – F. Rojas
212. *Puccinia pittieriana* – *Solanum tuberosum* – F. Rojas
213. *Rhizoctonia solani* – *Oryza sativa* – F. Rojas
214. *Thekopsora minima* – *Vaccinium corymbosum* – F. Rojas
215. *Radopholus similis* – *Musa paradisiaca* – Liliana Estupiñán
216. *Meloidogyne incognita* – Liliana Estupiñán
217. *Curtobacterium flaccumfaciens* pv. *flaccumfaciens* – *Glycine max* – Laboratorio Agronomica
218. *Meloidogyne* sp. – Liliana Estupiñán
219. *Aucalaspis tubercularis* – *Mangifera indica* – Miguel Sicilia
220. *Pennisetum setaceum* – Miguel Sicilia

221. *Aphelenchoides besseyi* – *Glycine max* – Liliana Estupiñán
222. *Phytophthora infestans* – *Solanum tuberosum* – F. Rojas
223. *Alternaria solani* – *Solanum tuberosum* – F. Rojas
224. *Cirsium arvense* – Laboratorio Agronomica
224. *Amaranthus spinosus* – Laboratorio Agronomica
225. *Pratylenchus brachyurus* – Aline Ferreira
226. *Sorghum halepense* – Laboratorio Agronomica
227. *Pratylenchus zae* – *Zea mays* – Liliana Estupiñán
228. *Fusarium avenaceum* – *Pisum sativum* – Antonio Rivera Martínez
229. *Helicoverpa zae* – *Zea mays* – Laboratorio Agronomica
230. CpMMV – *Glycine max* – Laboratorio Agronomica
231. *Thekopsora minima* – F. Rojas
232. CBT – *Solanum lycopersicum* – Laboratorio Agronomica
233. *Diaporthe longicolla* – *Glycine max* – Laboratorio Agronomica
234. *Bemisia tabaci* – *Cucurbita pepo* – Liliana Estupiñán
235. *Helicotylenchus multincinctus* – Liliana Estupiñán
236. *Pseudomonas syringae* pv. *syringae* – *Persea americana* – Miguel Sicilia
237. *Pratylenchus* sp. – Liliana Estupiñán
238. *Grapholita domestica* – *Prunus domestica* – Laboratorio Agronomica
239. *Xyleborus ferrugineus* – Laboratorio Agronomica
240. *Plasmopara viticola* – *Vitis vinifera* – F. Rojas
241. *Uncinula necator* – *Vitis vinifera* – F. Rojas
242. *Meloidogyne incognita* – Liliana Estupiñán
243. *Tagosodes oryzicolus* – *Oryza sativa* – Laboratorio Agronomica
244. *Icerya seychellarum* – *Mangifera indica* – Miguel Sicilia
245. *Meloidogyne* sp. – Aline Ferreira
246. *Phytophthora capsici* – *Capsicum annuum* – F. Rojas
247. *Cydia araucariae* – *Araucaria angustifolia* – Laboratorio Agronomica
248. *Sclerotinia sclerotiorum* – *Capsicum annuum* – Antonio Rivera Martínez
249. *Lasiodiplodia theobromae* – *Persea americana* – F. Rojas

## International Plant Quarantine Agents Data sheets:

### 15. *Plasmopara obducens* on *Impatiens walleriana* in Galicia (NW Spain)

José Luis Andrés Ares. Consultorías Noroeste S.C.

International Plant Quarantine Workgroup.

Data sheet: Nº 15

Agent: Nº 73

Name: *Plasmopara obducens*.

Host: *Impatiens walleriana*.

Geographical zone: Galicia (NW Spain).

Author: J.L. Andrés Ares & R. Bastos Bermúdez.

Year of the photograph: 2018.

Quarantine Zone:

Brazil (EPPO, 2021; Andrés & Bastos, 2021).

Copyright of the photographs: J.L. Andrés Ares.

**Determination methods:** determined by the authors plating the chromistic material sporulating on the diseased plant material on slides with methyl blue. The classification to species was carried out following the descriptions of the specialized bibliography (Shen *et al.*, 2013; Andrés & Bastos, 2021).

**References:**

<https://gd.eppo.int/taxon/PLASOB/categorization>.

## International Plant Quarantine Agents Data sheets:

### 22. *Rhizoecus falcifer* on *Buxus sempervivens* in Galicia (NW Spain)

José Luis Andrés Ares. Consultorías Noroeste S.C.  
International Plant Quarantine Workgroup.

Data sheet: Nº 22

Agent: Nº 86

Name: *Rhizoecus falcifer*.

Host: *Buxus sempervivens*.

Geographical zone: Galicia (NW Spain).

Author: J.L. Andrés Ares.

Year of the photograph: 2015

Quarantine Zone: Chile, Venezuela, Mexico, French Polynesia, Argentina (Andrés & International Plant Quarantine, 2021; EPPO, 2022).

Copyright of the photographs: J.L. Andrés Ares.

Determination method: the mounting methods were based on the studies of Williams and Granara de Willink (1992). The species determinations, carried out by the author, were performed based on the following taxonomical keys: Ramos-Portilla (2015).
